## ABOUT

Since our establishment, we have been working with all our strength to transform the construction industry in a positive way by doing our job well, constantly improving ourselves and keeping our promises. We place our employees, their health and safety at the center of the change we promised and aim for, and we realize the needs of our customers in a way that we have committed, in cooperation with all our stakeholders. We direct our activities with the understanding of corporate governance, customer satisfaction, sustainability and corporate social responsibility at international standards. We find it a priority to be permanent within the principles of universal competition, to grow patiently and step by step by signing innovative works in every market in which we operate.
